CONTENTS

Volume 12, 1960

Number 1 February 1960

J. S. Malkus and H. Riehl — On the dynamics and energy transformations in steady-state hurricanes 1
E. O. Jess — A numerical prediction experiment involving data paucity and random errors 21
M. Neiburger — The relation of air mass structure to the field of motion over the Eastern North Pacific Ocean in summer 31
M. A. Estoque — Dynamical prediction of arctic circulation 41
M. Rattray — On the coastal generation of internal tides 54
E. Eriksson — The yearly circulation of chloride and sulfur in nature; meteorological, geochemical and pedological implications, Part II 63

Shorter Contribution —

B. Saltzman and A. Fleisher — Spectrum of kinetic energy transfer due to large-scale horizontal Reynolds stresses 110

Current data on the chemical composition of air and precipitation 112
CO_2-values in Scandinavia May—July 1959 119

Number 2 May 1960

N. A. Phillips — On the problem of initial data for the primitive equations 121
R. G. Fleagle — Some estimates of the effects of heating on large scale disturbances 127
G. B. Tucker — The atmospheric budget of anular momentum 134
R. M. White and G. F. Nolan — A preliminary study of the potential to kinetic energy conversion process in the stratosphere 145
T. Ichiye — On critical regimes and horizontal concentration of momentum in ocean currents with two-layered systems 149
A. J. Faller — Further examples of stationary flow patterns in bounded basins 159
M. E. Stern — The salt-fountain and thermohaline convection 172
J. E. McDonald — Remarks on correlation methods in geophysics 176
J. E. Lodge, Jr., A. J. Mac Donald, Jr. and E. Vihman — A study of the composition of marine atmospheres 184
J. F. Bleichrodt, W. Bleeker and F. H. Schmidt — Changes in the radioactivity regime during the passage of a cold front over The Netherlands 188
A. J. Dyer and Miss S.-A. Yeo — A radioactive fall-out study at Melbourne, Australia 195
C. D. Keeling — The concentration and isotopic abundances of carbon dioxide in the atmosphere 200
L. D. Kaplan — The influence of carbon dioxide variations on the atmospheric heat balance 204
J. Kanwisher — pCO_2 in sea water and its effect on the movement of CO_2 in nature 209
W. Bischof — Periodical variations of the atmoshperic CO_2-content in Scandinavia 216
S. Fonselius and K.-E. Wärme — A method to make standard CO_2 samples for infrared gas analysis and the operation of an IRGA analyser for air samples from the Scandinavian network 227
M. A. Pomerantz, A. E. Sandström, V. R. Potnis and D. C. Rose — Solar disturbances and the cosmic ray equator 231
E. Nishimura, A. A. Kamitsuki and Y. Kishimoto — Some problems on Poisson's ratio in the earth's crust 236

Number 3 August 1960

E. N. Lorenz — Maximum simplification of the dynamic equations 243
J. Adem and P. Lezama — On the motion of a cyclone embedded in a uniform flow 255
W. L. Godson and M. A. MacFarlane — Tropospheric geopotential and velocity variances over the Arctic 259
K. Allington, B. W. Boville and F. K. Hare — Midiwnter ozone variations and stratospheric flow over Canada, 1958—1959 266
B. Bolin — On the exchange of carbon dioxide between the atmosphere and the sea 274
F. Munczak — On the appearance of ninhydrinpositive substances in the atmosphere 282
P. B. Storebö — Meteorological fractionation of nuclear bomb debris 293
L. B. Lockhart, Jr. and R. L. Patterson, Jr. — Measurements of the air concentration of gross fission product radioactivity during the IGY July 1957—December 1958 298
S. H. Small — Wet and dry deposition of fallout materials at Kjeller 308
A. H. Woodcock — The origin of trade-wind orographic shower rains 315
A. F. Elnadi and N. Farag — The effect of monochromatic light on the concentration of large ions 327
A. E. Sandström, E. Dyring and S. Lindgren — The daily variation of the cosmic ray nucleonic component at Murchison Bay and Uppsala 332
N. G. Jerlov and M. Fukuda — Radiance distribution in the upper layers of the sea 348
Letters to the Editor 356

Number 4 November 1960

S.-K. Kao — The effects of the thermal stratification on turbulent diffusion from a continuous fixed source 359
E. N. Lorenz — Energy and numerical weather prediction 364
B. Saltzman and A. Fleisher — The exchange of kinetic energy between large scales of atmospheric motion 374
W. H. Klein, B. M. Lewis, C. W. Crockett and I. Enger — Application of numerical prognostic heights to surface temperature forecasts 378
G. J. Haltiner and E. M. Chase — Some further results on convective currents 393
M. E. Stern — Instability of Ekman flow at large Taylor number 399
K. F. Bowden — The dynamics of flow on a submarine ridge 418
S. Uusitalo — The numerical calculation of wind effect on sea level elevations 427
G. S. Bien, N. W. Rakestraw and H. S. Suess — Radiocarbon concentration in Pacific Ocean water 436
D. Müller-Hillebrand — On the frequency of lightning flashes to high objects — A study on the Gulf of Bothnia 444
N. R. Parsons — Phase changes in the daily variation of the cosmic ray nucleonic component 450
Letters to the Editor 463
Index 470
